GLAZES

The previous page shows glaze chips of two different firings to show the variation that can be expected from the handmade tile glazing process. All glazes are very organic in nature and vary from batch to batch. For this reason it is important to get a current sample for reference. Not all variations are represented here

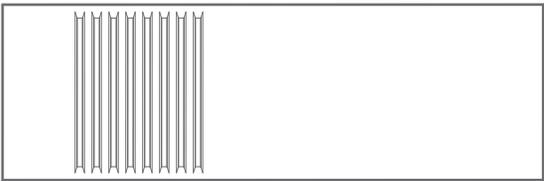

Custom glazes are available upon request. These require a conversation as well as some reference color chips for us to go by. Glazes cannot be Pantone matched, rather, an “in the spirit of” result is targeted but solid colors can be very close to original. Custom glazes take time to develop so it is a quotable process, varying per order.

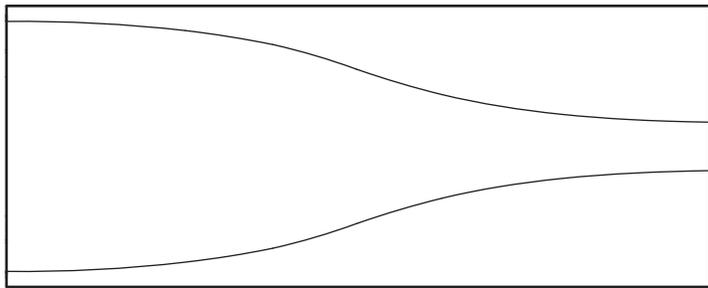

MADE TO ORDER DIMENSIONAL TILE
STYLE REFERENCE & WHOLESALE PRICES

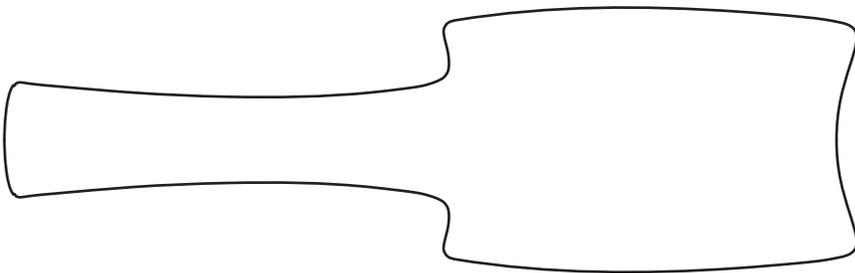

Step 3 x 9" 5.3 pieces per sq ft.

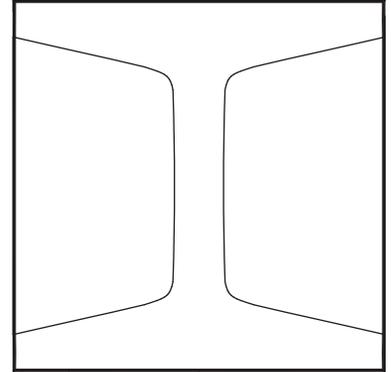

Maryline 6 x 6" 5.3 pieces per sq ft

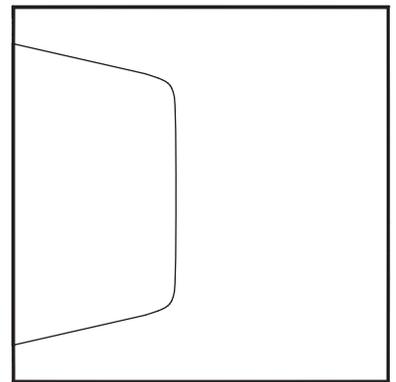

Hudson 4 x 10" 3.6 pieces per sq ft

InterLock 4 x 12" 4.3 pieces per sq ft

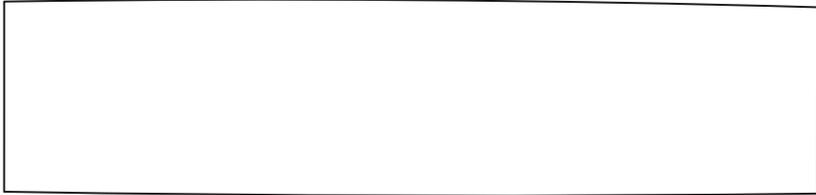

Peak 6 x 6" 4 pieces per sq ft

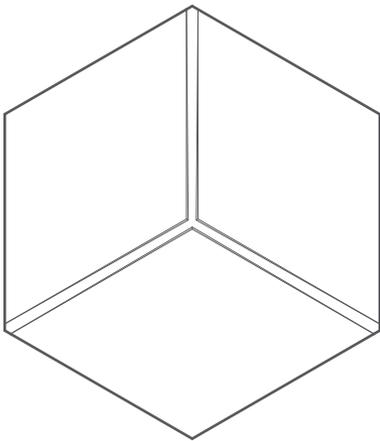

Valley 6 x 6" 4 pieces per sq ft

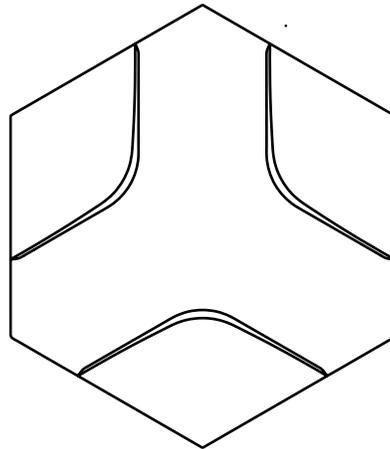

MADE TO ORDER DIMENSIONAL TILE
STYLE REFERENCE & WHOLESALE PRICES

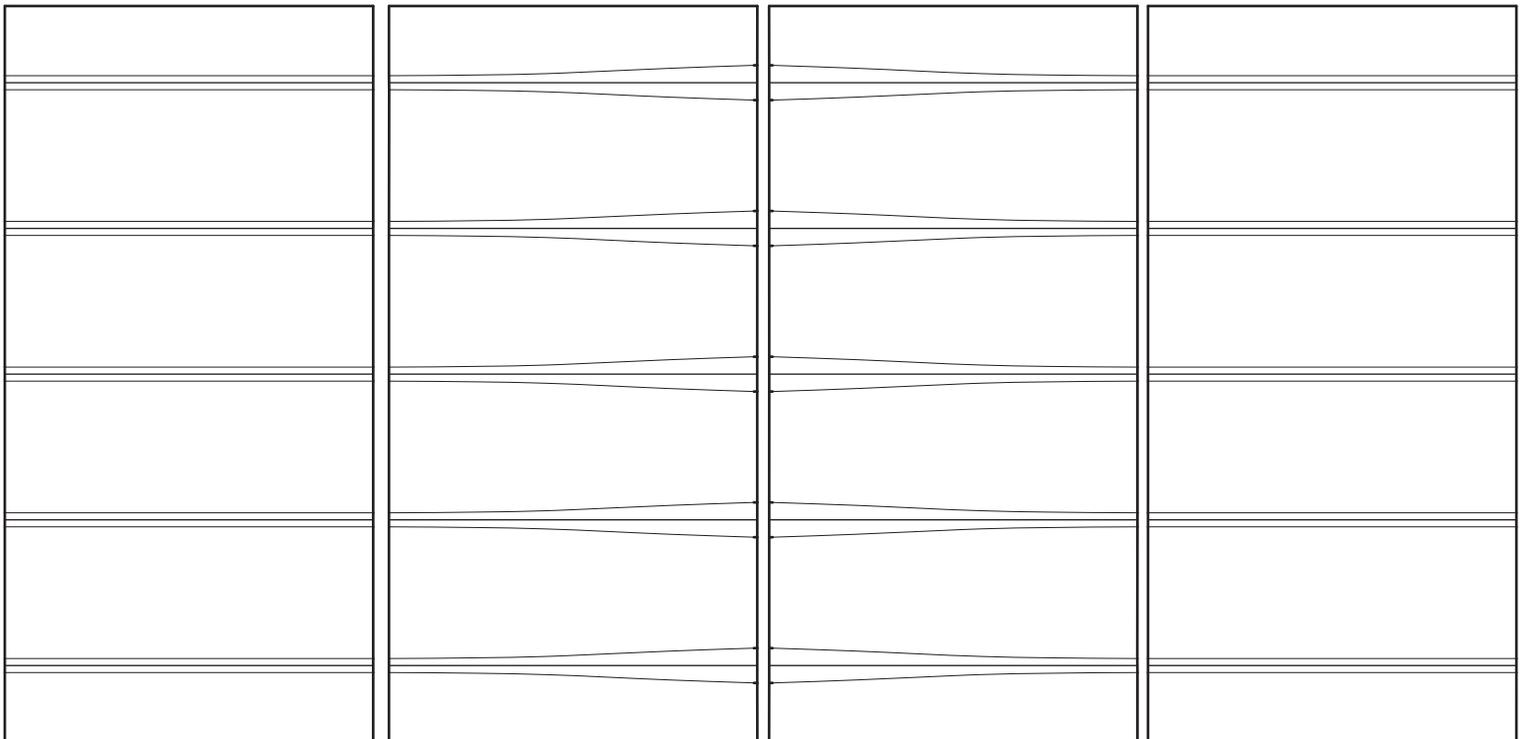

Roundhouse 4 x 12" 4 pieces per sq ft

Hexaline 6" 4.2 pieces per sq ft

Hexon 6 x 6" 4.2 pieces per sq ft

Flight Field 6 x 12" 2 pieces per sq ft

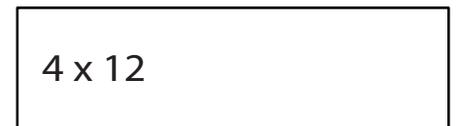

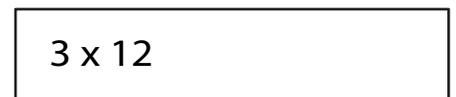

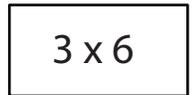

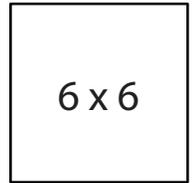

Flight Path 6 x 12" 2 pieces per sq ft

MADE TO ORDER FIELD TILE & TRIM

Field tile by the sq ft.

Trim pieces are priced per job:

-- per linear ft.

1" wide x 3/8" thick trim
made to length

- + Standard trim dimensions are 1" wide x 3/8" thick x lengths matching tile lengths but custom sizes are always possible to suit your particular needs.
- + We are happy to do make whatever is needed to make your design work
- + Standard thickness for all field tile is about 1/4"

TILE QUALITIES

Tile Variation:

A certain degree of variation should be expected in the glaze color, finish, and texture of ModCraft tile because they are handmade and our glazes are made up of raw oxide materials. This variation adds to the unique nature and beauty of the final installed product. Very slight bowing and raised corners may be present as is the nature of handmade tile. We exclude tiles from an order that stray too far from a reasonable norm.

Installation Tips:

It's important to plan the layout of ModCraft tile before installing to ensure the best possible layout accounting for size and color variation. Each box will contain a variety of glaze effects and tone and should be reviewed prior to final install to achieve the desired layout. Think of it like putting in a natural grain wood floor.

By using a deeper comb of Thinset it is possible to get a more level surface for tile that has thickness variations. Likewise, any size variation in tile size can be blended in by using a grout size that allows for flexibility to create a final balanced look. Making sure corners are lined up and horizontal lines are maintained will go a long way to unifying your ModCraft installation

ModCraft tile are made of porcelain and fired to 2300 degrees making them extremely durable and vitreous. They can be installed indoors and outdoors (in some climates) and are suitable for applications on walls, baths, showers, kitchen backsplashes, swimming pools, and spas. Outdoor applications cannot be guaranteed due to the varying types of substrates, adhesives, sealers and installation methods. Always seal your grout work and all matte glazes.

Glaze Qualities:

Some variation in tonal qualities can be expected with ModCraft handmade tile. This adds to the overall rich effect of the final installed product by carefully blending the tile and laying it out before installing.

Matte Glaze- Sealing matte glazes is recommended prior to grouting to allow for easier cleanup and maintenance. Only use water based sealers

HOW TO USE MODCRAFT TILE

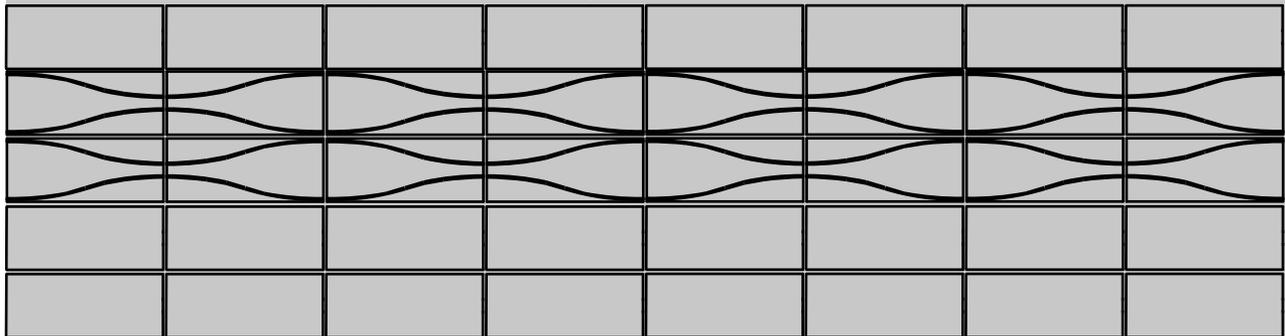

As a Stand Alone Tile

The most common use for ModCraft tile is as full dimensional tile installation, i.e. whole wall. Many installation examples can be found at our website. www.mod-craft.com

Combining with Field Tile:

Our flat tiles can be used together with our dimensional tile when only an accent of dimension is wanted or when various hardware needs to be accommodated. Glazes may pool and spread differently on flat tiles thereby giving a slightly different appearance than the glaze effects on the dimensional tile.

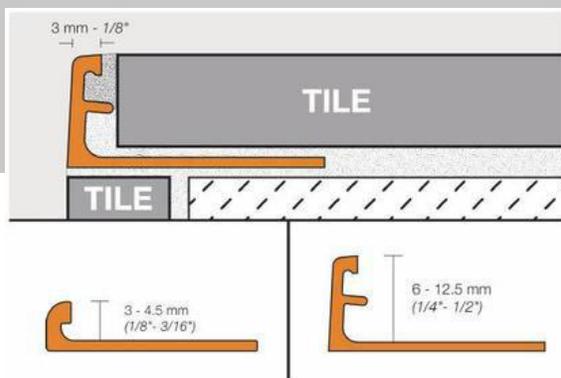

example of combining dimensional and flat tile:

How to Edge Finish:

ModCraft will ease the edges and glaze those edges that will be exposed on a particular area of a planned installation. This process is +10% for those pieces needed to be finished like this.

Otherwise, Schluter Systems makes a very nice edge finishing product that works perfectly with our tile and is most often used for its clean modern look www.schluter.com

PURCHASING AND POLICIES

How To Purchase and Lead Times:

The best place to start is with an inquiry to info@mod-craft.com. We will direct you to your nearest dealer, or if one is not conveniently located to you, we will work directly with you for samples, layout help, interaction with your designer, etc.

We ask for a 50% deposit to begin work and 50% + shipping and packing materials to release tile to our shipper.

Lead time is generally 6-10 weeks and production starts upon receipt of deposit. We accept checks from our dealers, and a scan of the check via email will secure your order in the schedule.

No refunds can be issued for orders once production has started.

Variations in tile size, texture, and color should be expected because of the handmade nature of our tile. This is completely normal for our product and inherent to the beauty and character.

Samples:

Single samples can be purchased at a per piece price plus shipping. PayPal invoices are sent for samples. All samples are made to order and will ship within a week.

Packaging and Shipping:

Packaging is charged at \$4.50/box if we use new materials for shipping via UPS/FedEX (this includes 2 cartons, 1 master carton, and packing pads) or \$1.25/box for the use of recycled clay boxes and new pads (this option is good for pallet orders). We try to use only recycled paper products and corn starch peanuts, trying to avoid plastics as much as possible. Pallet fee is \$10.

Shipping can be done through our agent or yours. If using ours, we will add the shipping charges into your order at the final 50% payment request.

How to Order

All sample and full orders should be emailed to info@mod-craft.com. We will review the P.O. or Sample Request and get it back to you in the form of either email confirmation (for samples) or written estimate with pricing.

Estimates are converted to an order and put into production when we receive 50% deposit.

Deposit checks can be made out to ModCraft Inc. and sent to:

ModCraft
18 Overlook Ave
Beacon, NY 12508
